PROFESSIONAL SUMMARY

Detail-oriented Electronics and Communication Engineering student with hands-on experience in AI data annotation, prompt evaluation, embedded systems, and programming. Experienced in reviewing AI-generated responses, following detailed quality guidelines, and identifying factual, logical, and language-related issues. Strong analytical thinking, excellent written English, and a passion for improving AI systems through high-quality human feedback.

EDUCATION

Bachelor of Technology (B.Tech)

Electronics and Communication Engineering

Tezpur University

Expected Graduation: 2029

Completed First Year

EXPERIENCE

AI Data Annotation / AI Trainer

Freelance | Remote

- Evaluated AI-generated responses for quality, factual accuracy, reasoning, and language.
- Compared multiple model outputs and selected higher-quality responses based on detailed evaluation guidelines.
- Identified hallucinations, logical inconsistencies, grammatical errors, and instruction-following issues.
- Maintained high attention to detail while working independently under quality standards.

- Worked with multilingual and English-based annotation tasks.

PROJECTS

Smart Plant Monitoring System

Designed and developed a complete IoT-based smart irrigation system using ESP32.

Key Features:

- Real-time monitoring of soil moisture, temperature, humidity, and water tank level
- Live web dashboard
- Automatic irrigation control
- Telegram notifications
- OLED display
- Human detection using IR sensor
- Touch interaction
- Relay-controlled water pump
- PCB designed using EasyEDA

Technologies:

ESP32 • C++ • Arduino IDE • Embedded Systems • IoT • MQTT • PCB Design • GitHub

ESP32 Learning Repository

Built multiple embedded system mini-projects including:

- Ultrasonic distance measurement
- Relay control
- Soil moisture sensing
- PWM LED control
- Touch sensor applications
- Button interrupts
- Wi-Fi experiments

TECHNICAL SKILLS

Programming

- C
- Python (Learning)
- Basic C++

Embedded Systems

- ESP32
- Arduino
- Sensors and Actuators
- UART
- GPIO
- PWM

AI Skills

- AI Response Evaluation
- Prompt Assessment
- Data Annotation
- Quality Assurance
- Instruction Following
- Error Identification

Tools

- Git
- GitHub
- VS Code
- EasyEDA
- Microsoft Office

SOFT SKILLS

- Analytical Thinking

- Attention to Detail
- Problem Solving
- Written Communication
- Fast Learner
- Time Management
- Adaptability

ACHIEVEMENTS

- Successfully completed an end-to-end IoT Smart Plant Monitoring System.
- Built multiple embedded systems projects using ESP32.
- Experience contributing to AI model improvement through annotation and evaluation tasks.
- Active learner in Python and AI technologies.

LANGUAGES

- English (Professional Working Proficiency)
- Hindi (Professional Working Proficiency)
- Assamese (Native)
